HIDEAWAY™ BINS

EFFICIENCY, SUSTAINABILITY
AND LIFESTYLE

Manage, sort and store your waste, recycling and laundry with Hideaway.

We are industry leaders in designing practical hidden storage systems that suit your lifestyle. Hideaway Bins offer solutions for everything from hygienically disposing of waste and sorting your recycling to separating and storing your laundry.

A Hideaway Bin solution will help you create sustainable waste and recycling practices in your household with as little impact to your lifestyle as possible. A key to improving recycling and reducing waste is having a good waste management system.

Did you know that your bin is one of the most used appliances in your home?

With that in mind, it's important to choose a bin system that's simple to use, durable, easy to clean and one that makes your everyday waste and recycling routine effortless.

Hideaway Bins are all made in New Zealand, and have built an enviable reputation for quality and durability.

Hideaway's intelligently designed ranges include: the award winning Concelo® range, Hideaway Compact and Hideaway Compact Floor Mount. With each of the ranges offering distinctive features, there is sure to be a Hideaway Bin to suit the requirements of any residential or commercial project.

To assist you in choosing the right bin to suit your lifestyle, see the Waste Management Guide in this brochure and decide which Hideaway Bin is the right solution for you.

WHAT SEPARATES HIDEAWAY BINS FROM THE REST?

BENCH HEIGHT INSTALLATION

Most Hideaway Bins have the option of being mounted to the top of kitchen cabinets directly under the benchtop. This means the bins are at the optimal height for clearing waste directly off a benchtop. This reduces the amount of bending required when disposing of waste - remember, your waste bin is one of the appliances you use most in the kitchen.

BUILT-IN ACTIVE LID

Hideaway is the pioneer of waste bins with a built-in self closing lid. When you have a handful of rubbish, you don't want to be juggling between opening a door and lifting a lid while trying not to spill rubbish.

The Concelo range has an Active Lid mounted to the top of the bin system inside the cabinet. The Active Lid closes itself onto the buckets when the bin is closed to control odours and moisture while still keeping your hands free.

EASY ACCESS TO REAR BUCKET

All Hideaway Bins are designed with over extension runners. This makes it easy to remove or empty the bin without having to compromise on space or ergonomics. The rear bucket can be removed independently of the front bucket from beneath the bench top.

FLEXIBLE MOUNTING OPTIONS

Hideaway Bins are designed with a range of mounting options to suit the environment they are installed within. Top mounting for easy access, side mounting for additional support and floor mounting for flexibility in compact spaces.

WASTE MANAGEMENT GUIDE

HOW MANY BUCKETS?

The number of buckets required depends on how many waste streams the waste needs to be separated into, and where those waste streams go.

Check with your local council: what is collected by local councils now, and what is planned for the future? Some councils use a commingled recycling system, while others separate recycling. Many councils are introducing organic (food scrap) collections in the future.

Consider your lifestyle – do you want to home compost food scraps? Would you like to separate soft plastics for recycling?

BIN PLACEMENT

Consider where waste is generated in your home, and where space is available to collect waste.

- **60-70% of all household waste is generated in the kitchen**, making it critical to consider the optimal waste management system for this area.
- Will all kitchen waste buckets be combined in one bin unit or be separated into two bin units? Using two bin units allows greater design flexibility.
- Consider ergonomics: keep in mind the bin is used 30+ times per day. Installing at bench height is recommended.
- Waste is also generated in the bathroom, and this typically includes items that can be recycled.

FEATURES OF BIN SYSTEM

An important part of the waste management equation is a durable, flexible and easy to clean bin system for your home.

Dealing with rubbish is dirty and smelly. To combat this, Concelo bins are easy to clean, virtually eliminating troublesome dirt traps, which can cause maintenance issues later if left unchecked. Concelo bins also have an innovative hands-free Active lid system to control odours and moisture.

Concelo's Clip'n'Clean System.
See page 12 for more info.

WHAT SIZE BUCKET?

Calculate the volume of waste your family produces each week:

Based on 60 litres of waste per person, per week, categorised into: landfill, recycling, glass and compost.

X EMPTIED EXAMPLE: shows a 4 x 16L bin system, and how often would you need to empty your bin system each week. Separating your waste into more collection streams increases recycling and means fewer bin empties.

Note: Co-mingled recycling volume consists of Paper/Card (16%), Cans (9%), Plastic (16%).

Consider a quad bucket system to separate your waste into the different collection streams. See next page for more info.

No. PEOPLE	X EMPTIED	COMPOST	GLASS	LANDFILL	RECYCLING
60L (each)	100%	7%	11%	43%	39%
1 (60L)	1x (64L)	4L	6.5L	26L	23.5L
2 (120L)	2x (128L)	8L	13L	52L	47L
4 (240L)	4x (256L)	16L	26L	104L	94L
6 (360L)	6x (384L)	24L	39L	156L	141L
8 (480L)	8x (512L)	32L	52L	208L	188L

CR600-413D-W with coloured liner holders

SEPARATE WASTE & RECYCLING

CONCELO RECYCLING UNITS

With many councils collecting 3 or 4 separate types of waste and recycling, there is an increasing need for an easier way to separate waste conveniently within the kitchen.

Introducing the new Concelo CR600 models, our first ever 4-bucket-in-one waste bins. These have been developed to allow waste to be easily separated into four waste and recycling buckets in one convenient unit that fits into a standard 600mm-wide kitchen cabinet. Available in a range of bucket sizes with up to 64L total capacity.

Alternatively, some Concelo models can be stacked in a cabinet to provide a 4-bucket solution in a narrow 350 or 400mm cabinet.

In larger kitchens a small twin bin can be positioned next to the sink, for landfill and food scraps, while a larger bin can be positioned elsewhere in the kitchen or scullery for recycling.

See pages 18-20 for Concelo range.

COLOUR CODED LINER HOLDERS

Create a simple, sustainable waste management system in your home or office with the new colour coded Hideaway Liner Holders. These liner holders are compatible with Concelo and Compact bucket sizes: 13L, 15L, 16L, 20L and 35L. Use these coloured liner holders to correctly sort your waste and recycling streams.

Available to purchase as a separate accessory. See page 31 for accessory details.

Please note: Check with your local council or waste collection service for the specific colours used in your area. Each region or council may use different colours for different waste streams eg blue can sometimes represent paper collection, rather than glass.

HIDDEN RECYCLING STATION

CR350-135D-W
CR350-213D-W

COMMERCIAL RECYCLING

Sustainable recycling practices in the workplace begin with making your recycling solution easy to use, durable and hygienic while remaining design-focused.

Hidden from sight

Recycling bins placed in walkways can look unhygienic and be a real eye-sore. Integrate a hidden recycling station into a commercial environment to ensure a professional workplace with design front of mind.

Durability

Commercial environments are high use and very demanding. The Concelo range has been designed with quality materials to ensure the units withstand these challenges.

All Concelo plastic components are made from virgin material, which means the strength of the components is not compromised by using fillers. At the end of their life cycle, all polypropylene parts are fully recyclable to ensure minimal impact on the environment.

commercial

recycling station

Concelo uses German-made soft close runners that are rated to 45kg and use an innovative mounting system to make runner servicing easier.

Smart Design Features

With the large volumes of waste generated, hygiene and the control of odours is paramount within a commercial space. The Active Lid system controls odours and moisture and is hands-free, meaning minimum contact. The Clip'n'Clean system makes it much easier to clean and maintain hygiene standards.

See the Concelo range (page 18-20) for more details.

MULTI-AWARD WINNING BIN RANGE

CONCELO[®] REDEFINES WHAT YOU SHOULD EXPECT FROM YOUR MOST USED APPLIANCE

Concelo, Hideaway's premium bin range and the new standard in waste bins and laundry hampers.

The Concelo range is the result of seven years of research, development and testing. It builds on Hideaway's strong heritage of quality and innovation to create the next generation of premium hidden storage solutions.

The Concelo range has been designed to deliver a waste bin and laundry hamper without compromise. Every element of the range has been engineered and tested to ensure it delivers both the form

and function that should be expected from a premium home appliance.

Concelo boasts not just a clean design aesthetic, but its Clip 'n' Clean features help keep your bin looking and smelling clean.

Managing waste can be a challenge, but Concelo is the easiest bin in the world to keep clean, while its Active Lid helps control odours.

Concelo not only takes all the best features you would expect from Hideaway and improves them, it totally redefines what you should expect from your bin solution.

**AWISA 2018
GOLD STAR WINNER**
FOR INNOVATIVE TECHNOLOGY

PATENT PENDING: concelo.com/ip

"A sophisticated product solution, this kitchen waste bin convinces thanks to its automatic, odour controlling closing mechanism."
- Judge's comment, Germany 2019

"Concelo is clever, smart, well designed and is superior to every other waste system on the market."
- Judge's comment, Australia 2018

CLIP'N'CLEAN SYSTEM

Concelo's unique Clip'n'Clean System creates a painless cleaning process in just 3 simple steps:

- 1 Effortless removal
- 2 Washing in warm soapy water
- 3 Reinstallation within moments

Concelo Easy Clean

SCAN ME

Concelo Active Lid

SCAN ME

ACTIVE LID SYSTEM

Managing waste can be a challenge, especially the smell. Concelo overcomes this with its Active Lid designed to help control odours and moisture.

The Active Lid is hidden from sight at the top of the bin inside the cabinet, and drops down to close over the buckets when the unit is closed.

The motion of the lid is synchronized with the opening and closing action of the unit, which lets you keep your hands free to simply drop waste into the bin.

The Active Lid has been designed so that it can very easily be removed and re-installed with the help of a cleverly designed lid tool!

ACTIVE LID DROPS DOWN OVER THE
BUCKET WHEN THE BIN IS CLOSED

Concelo.

THE PERFECT WASTE
SOLUTION FOR THE

HOME OWNER

No more dirt traps!

Clip'n'Clean components allow easy access to clean between the bin frame and door front.

Concelo.[®]

A PREMIUM OPTION FOR THE DESIGNER

Give the homeowner a waste management system that functions effortlessly without compromising your modern kitchen design.

Bench height installation
Optimal height for clearing waste off the bench. No bending to place waste in buckets or remove buckets for emptying.

SOPHISTICATED DESIGN FEATURES

A bin range with design front of mind. Sophisticated features, modern colour options and clean, concealed componentry.

Concelo in Arctic White makes it possible to have a premium bin system that matches ever popular white drawer systems. With easy clean components, it's possible to keep it looking crisp and white. While the Cinder colour matches the trend for dark grey kitchen components and cabinetry.

Concelo's versatile measurements for differing cabinet widths gives you the flexibility to choose a model that fits single, 50/50, 60/40 or 2/3 to 1/3 drawer spits to match design preferences.

See additional features on pages 12 and 13 that the homeowner will love when you specify Concelo.

PRECISE SECURE DOOR ADJUSTMENT

2-piece door bracket design provides simple yet precise 6-way door adjustment with **LOCKING BOLT SYSTEM** to lock door position in place.

1. Horizontal adjustment $\pm 2.5\text{mm}$
2. Vertical adjustment $\pm 2.5\text{mm}$
3. Tilt adjustment ± 0.75 degrees

FLEXIBLE MOUNTING OPTIONS

System 32 Side Mounting

Concelo has been designed with simplicity in mind. The entire range uses one System 32 drilling pattern to mount to the sides of the cabinet using high strength Euro screws. All models fit straight into standard cabinet widths with 16mm sides.

Top Mounting for over width cabinets

Concelo has been engineered to give design flexibility when needed. Concelo waste bins (excluding CR600 models) can be installed in over width cabinets by mounting to the top of the cabinet using the **CRTMB Top Mount Brackets**. This gives freedom to place the bin in the ideal position without compromising strength or rigidity, and no need for packers. This is particularly useful for retrofit situations.

Concelo.[®]
BY HIDEAWAY

LAUNDRY HAMPER RANGE

Concelo[®] Laundry Hampers offer a sophisticated storage solution. Based on the same platform as the Red Dot award-winning Concelo[®] Waste Bin, the Concelo[®] Laundry system continues to raise the bar in what should be expected from a laundry hamper.

Hide your laundry, store your extra linen or use as a removable washing basket. Concelo Laundry Hampers can also be integrated into wardrobe or bathroom cabinetry to discreetly hide laundry.

Concelo Laundry Hampers are available in three models. The large 60L hamper is big enough to cope with a family load of washing and the 35L hampers maximise space while still offering excellent

storage capacity. Two 60L hampers can be installed side by side in your laundry to separate washing or choose the 1 x 35L or 2 x 35L hampers when space is at a premium.

Concelo Laundry hampers have been designed to deal with the humidity and moisture of the laundry environment.

The light-weight hampers are easy to remove and feature air vents to reduce moisture and a solid base to prevent drips. The hampers are supported by Clip'n'Clean trays, which are moulded from durable polypropylene, which will never rust or corrode.

Ergonomic and functional, Concelo hampers are designed to withstand the weight of wet washing and still look good doing it - a must for your laundry!

HC115D-W

HIDEAWAY™ COMPACT RANGE FEATURES

MOUNTING OPTIONS

Top- and side-mount options provide flexible installation for optimal positioning. Floor-mount models offer a great retrofit solution for existing cabinets.

The entire range uses System 32 drilling pattern to mount to the sides of the cabinet using high strength Euro screws. Most models now fit straight into standard cabinet widths with 16mm sides.

BUCKETS

Crafted from recyclable, food-grade polypropylene, each bucket includes a liner holder to keep your bin liner securely in place.

INSTALLATION OPTIONS

1. Door Pull – One-Step Action:

The cabinet's front fascia is securely attached to the Hideaway Bin's door bracket, allowing easy access by simply pulling open the cabinet door.

2. Handle Pull - Two Step Action:

Access the bin by first opening the hinged cupboard door, then pulling out the bin using its built-in handle.

ELECTRONIC PUSH TO OPEN COMPATIBLE

Only available for models - HC213, HC216, HC215, HC220

SOFT CLOSE RUNNERS

High quality soft close, over extension, ball bearing runner.

RUNNER RATING

45kg dynamic weight loading for HC235 and HC240 models.
38kg dynamic weight loading for all other models.

DURABLE METAL FRAMEWORK

1.0mm zinc treated steel, powder coated for durability.

NEW TRUE 6-WAY CAM DOOR ADJUSTMENT

1. The True 6-Way CAM Door Adjustment system offers precise vertical and tilt positioning, ensuring a perfectly aligned door.

2. Featuring six locking bolts, this advanced mechanism firmly secures the door in place, delivering enhanced stability and reliability, eliminating the need for post-installation adjustments.

THE BIGGEST BUCKET FOR THE SMALLEST SPACE.

motorhome

COLOURS

Door pull models are available in two colours: Arctic White and Cinder.

PRODUCT CODES

Hideaway Bin codes appear in blue (eg HC215D-C). Use these codes when placing an order for your Hideaway Bin.

BENCH OVERHANG CLEARANCE

Hideaway Compact Bins are designed with over-extension runners, allowing them to accommodate bench overhangs of up to 40mm when mounted at the top of the cabinet. This feature enables easy removal of the rear bucket without needing to remove the front bucket. For bench overhangs greater than 40mm, the unit can be installed lower within the cabinet to ensure proper functionality.

NOTE: The Hideaway Compact range is designed for residential use and is not recommended for commercial applications. Its use in this application will void the warranty.

HC150H-W/ Handle Pull / Arctic White
Ideal for a larger family kitchen.
NOTE: Bucket is nominal 50L size, actual capacity is 46L.

INSTALLATION INSTRUCTIONS -

All measurements given are internal (wall to wall) and are the minimum required to fit each unit.

IMPORTANT NOTE FOR HANDLE PULL MODELS -

Allowance should be made for the width of the bin to clear the door and hinge mechanisms. For top mounted models, installation also requires that the top door hinge be 150mm from the top of the door to allow clearance for the bin handle.

*Pictured Models

MAXIMIZE SPACE WITH COMPACT FLOOR-MOUNT BINS

When bench-height installation isn't an option, Hideaway offers a range of smart bin solutions designed to mount securely to the base or floor of a cabinet, effortlessly fitting around existing plumbing.

- Single-bucket models are perfect for compact spaces, such as bathroom vanities or tight under-sink areas.

- Double-bucket options provide a convenient waste and recycling solution where space allows.

Installation is quick and straightforward, making these bins an ideal choice for DIY projects or retrofitting existing cabinets. With a fully enclosed, one-piece metal frame, there's no assembly required—just six screws into the cabinet base, and it's ready to use!

HC215H-W

HC220H-C

HIDEAWAY™ COMPACT FLOOR MOUNT MODELS

1 x 15 litre bucket Floor Mounted
(WxHxD)mm 268 x 305 x 360

Available in:
HCF115H-W/ Handle Pull / Arctic White
HCF115H-C*/ Handle Pull / Cinder

1 x 20 litre bucket Floor Mounted
(WxHxD)mm 268 x 408 x 360

Available in:
HCF120H-W*/ Handle Pull / Arctic White
HCF120H-C/ Handle Pull / Cinder

2 x 15 litre buckets Floor Mounted
(WxHxD)mm 300 x 308 x 510

Available in:
HCF215D-W/ Door Pull / Arctic White
HCF215D-C/ Door Pull / Cinder
HCF215H-W*/ Handle Pull / Arctic White
HCF215H-C/ Handle Pull / Cinder

2 x 20 litre buckets Floor Mounted
(WxHxD)mm 300 x 408 x 510

Available in:
HCF220D-W/ Door Pull / Arctic White
HCF220D-C/ Door Pull / Cinder
HCF220H-W/ Handle Pull / Arctic White
HCF220H-C*/ Handle Pull/Cinder

COMPACT RANGE FEATURES:
Refer page 28

FLOOR MOUNT INSTALLATION INSTRUCTIONS - All measurements given are internal (wall to wall) and are the minimum required to fit each unit.

IMPORTANT NOTE FOR HANDLE PULL MODELS - Models HCF115H, HCF120H, HCF215H and HCF220H - if hinges are used that do not allow the door to clear the opening fully, allow an extra 10mm width (check as this may vary).

MORE THAN JUST A BUCKET

Hideaway buckets are **made with 100% virgin polypropylene**, giving them the durability to cope with the tough daily demands of the kitchen environment. The **food-grade polypropylene** material is FDA (U.S.A) approved, meaning Hideaway buckets can be used for bulk food storage of dry food stuffs. At the end of the life-cycle, the bucket and liner holder is **fully recyclable** to minimise environmental impact.

All buckets used in Hideaway Bins come with matching **liner holders**, to hold bin liner bags in place. This not only looks tidy, it keeps your bin liner clean for removal and ensures the liner bags don't slip inside the bucket.

The 35L and 40L buckets feature Hideaway's **patented air vent system**: four U-shaped air vents allow trapped air to escape through the lip of the bucket as you push your bin liner into the bucket cavity. This unique, patented design will **eliminate the frustration of trapped air** restricting your liner, maximising bin liner volume.

AIR ESCAPES THROUGH THE PATENTED VENTS AS YOUR BIN LINER IS PUSHED INTO THE BUCKET CAVITY

Electronic Push to Open Kits	
Suitable for Concelo range + Compact HC215D, HC220D models	
Available from leading hardware suppliers.	

Concelo is warranted for use with Häfele Grass Sensomatic or Blum Servo Drive systems. See page 15 for more information. Refer to the technical guides on the Hideaway website for installation of electronic systems.

Push to Open Bracket		
Suitable for		Colour
Concelo Bins & Hampers		 

To work with electronic push to open systems. Not required in some applications. Refer to the technical guides on the Hideaway website for installation of electronic systems.

NZ MADE
HIDEAWAY™ BINS
BY KITCHEN KING®

100% KIWI OWNED AND OPERATED

Hideaway Bins are proudly designed and made in New Zealand by Kitchen King Ltd and have a strong local and international reputation for the quality and innovation of our hidden waste, recycling and laundry solutions.

Kitchen King is a 100% family owned and operated business and has been under the direction of the Bertelsen family since 2006. Our company is run with joint directorship by close father and daughter team, Allen and Jamie Bertelsen.

Our team at Kitchen King not only manufacture and distribute Hideaway Bins but have expanded to include research and design, to ensure we are able to release new and innovative products to the market.

With an industry-leading engineering and manufacturing process the team at Kitchen King continue to produce creative solutions for both residential and commercial storage, waste and recycling requirements.

Sustainable Design

Hideaway bins has always focused on designing quality products that are robust and durable. Because they are built to last, Hideaway Bins do not need to be replaced prematurely and are a more sustainable use of resources. We design our bins so that they can either be repaired or components like plastic buckets can be fully recycled at the end of their life.

Responsible Manufacturing

We have put a number of different practices into place to ensure that our environmental impact is reduced. This includes recycling waste and packaging during manufacturing and eliminating polystyrene from our packaging.

Global GreenTag Certification

Hideaway Bins are delighted to have achieved Global GreenTag™ GreenRate Level C certification for our Hideaway Compact waste bins, Concelo waste bins and Concelo laundry hampers.

Advocates for Change

We are passionate advocates for enabling better waste behaviours at work and at home. Through smart design and education, we help our customers reduce the amount of waste that goes to landfill, and increase the amount that is diverted to recycling or composting.

METAL COMPONENTS

Hideaway Bins work closely with New Zealand's leading sheet metal manufacturers and aluminium extruders to produce our metal components.

We use electro-galvanised steel for our sheet metal components. This has a smooth consistent thin layer of zinc to provide corrosion resistance and has a consistent surface for an excellent finish when powder coated.

Our sheet metal suppliers utilise cutting edge sheet metal technology, including fibre laser cutters, turret punches, CNC folders and laser welding. This delivers high quality precision components which ensures the quality and reliability of all Hideaway Bins.

UNIQUE POWDER COATING

All metal components are powder coated to provide a tough yet attractive finish. To improve the overall resistance of the coating, all individual metal parts undergo an iron phosphate pre-treatment and are then subjected to an acidic bath.

The powder coat is then electrostatically charged to ensure even coverage, and applied manually using a hand gun to ensure maximum coverage. The powder coating is then cured under heat to allow it to form a hard finish.

PLASTIC COMPONENTS

We partner closely with leading plastic injection moulding suppliers. This gives us access to specialist skills and manufacturing machinery, allowing full control over the plastic injection moulding processes ensuring Hideaway Bins stringent quality standards are met.

All plastic components are made using virgin material for maximum durability. While using virgin material is more expensive, it means the strength of the components are not compromised by using fillers. At the end of their life, all parts are all fully recyclable to ensure minimal environmental impact.

Our buckets are made using a food-grade polypropylene material which is FDA (U.S.A) approved meaning they can also be used to store dry food stuffs.

BIN ASSEMBLY

Once all Hideaway Bin components are ready for assembly, our product technicians assemble the bins at our warehouse in Silverdale, Auckland, NZ. This assembly process allows for all parts to be checked to ensure the highest quality end product.
